PROFILE

Kris is an experienced consultant of 10+ years, with advanced knowledge of Project Management principles. Combining his experience with an IT education, he has implemented many Project Controls Solutions for mega-projects. Stozek's recent focus is Enterprise Project Portfolio Management, integrating Project Management Organization (PMO) data with the broader Enterprise. A deadline-savvy, team player, who expertly collaborates with stakeholders at all levels.

KEY EXPERIENCE AND SERVICES

ENTERPRISE PROJECT PORTFOLIO MANAGEMENT

Many companies involved in the generation of revenue utilizing infrastructure assets are now facing a destiny dependent on their Project Delivery Organizations (PDOs) successfully achieving the Life Extension Objectives of the Enterprise. Integrating People, Process, Technology, and Methodology he has oversaw the revamp of multiple project controls suites, development of frameworks for consistent portfolio management across the organization, processes designed to scale with project complexity, and methods and toolsets designed to centralize project data and metrics at the Enterprise level:

- ▶ Enterprise Scheduling to integrate Project Scheduling with Asset/Investment Planning
- ▶ Enterprise Reporting to Standardize Metrics
- ▶ Enterprise Cost Management to align Cost Control with Finance
- ▶ Enterprise IT Management to ensure PDOs are supported

These companies, using Modus' recommendations, continue the journey to reliable, knowledge-based Enterprise Asset, Investment, and Portfolio Management.

PROJECT AND PORTFOLIO MANAGEMENT

Stozek has managed portfolios of capital infrastructure projects as well as portfolios of functional projects with life-cycle budgets in excess of \$1 billion, provided project management and controls leadership to Project Owner teams and EPC vendors, to integrate all schedules with the Program Integrated Master Schedule. Interfaced with 50+ project, functional, and vendor stakeholders to successfully communicate status of dozens of projects to senior executives, monthly, within 1 hour.

PROJECT CONTROLS AND CLAIMS INFRASTRUCTURE

Working collaboratively with the team, developed and operated custom Enterprise Reporting Systems, providing critical information for all levels of management. Primavera Administration for multiple contractors and 60+ users. Developed event-based earned value methodologies to integrate cost and schedule to provide metrics such as SPI, CPI, and Estimate to Complete. Created time management tools using JobClock data. Provided Claims integration and support to collect historical data and information of vendor planned versus actual progress/costs to aid in claims resolution.

IT SERVICE MANAGEMENT

Oversaw integration solutions between the Cloud and On-Premise applications, delivered comprehensive Data Warehouse designs: Data Dictionary, Master Datasets, and Structure Schemas to provide a Single Source of Truth for Master Project Controls Data, including Primavera Extended Schema. Conducted cross-organizational review of governance to generate process and information flow visualizations. Designed and developed analysis tools to help the Project Controls specialists.

SOFTWARE DEVELOPMENT

Developed custom Primavera API utilities to auto-update and integrate schedules, built java based middleware to facilitate the integration of work management and scheduling, while also managing all Primavera Global Objects and Libraries. Created a relational database to integrate Finance, Engineering, Procurement, Construction, and Commissioning data, providing standard reports for all.

MASTER DATA MANAGEMENT & ORGANIZATIONAL CHANGE

Led a 12 member Data Integrity team, implemented a Master Data Management (MDM) solution, and created associated governance processes. Utilized an unorthodox (in Nuclear) agile personnel management methodology (SCRUM). Facilitated Documentation War Room initiative, ensuring timely field issuance of execution work instructions and commissioning documentation across multiple vendors. Provided business process documentation and training roll-outs.
